

## Spreadsheet Audit Service

### [Send off for a comprehensive Spreadsheet Audit Report!](#)

Reduce risk of financial loss

Save time and avoid human error

Make your spreadsheet easier to read and use

Improve your Excel technique

Know what to do when spreadsheets get too big, need to be shared, or need locking down

### [What's in the Spreadsheet Audit Report?](#)

Errors analysed and highlighted, with suggested corrections

Formulae tips for ease of maintenance and efficiency

Commentary on VBA where appropriate

Suggestions for automation opportunities

Design and layout recommendations

Alternative approaches to solving the business problem

### [How is the Spreadsheet Audit Report created?](#)

We look at the spreadsheet's business context - who uses it, what decisions do they make with it, who maintains it and how much time does it take?

We look at the design and layout of the spreadsheet – is it easy to enter new data or edit existing data, are features such as charts and pivot tables used, are named ranges used?

We use automated testing tools to check the correctness and efficiency of formulae

We review macro code for coding standards, safety, ease of maintenance and robustness.

### [How much does it cost?](#)

In this introductory period, we are offering our Audit Report free of charge.

### [How do I get my report?](#)

Send your spreadsheet to [info@brdalby.co.uk](mailto:info@brdalby.co.uk) with subject line 'Spreadsheet Audit Report.'

We'll get your Audit Report back to you in 24 hours.
